SUMMARY

Product designer at the intersection of computer science and human-computer interaction, grounded by a dual degree in Computing and Human Sciences from IIIT Hyderabad. Designed a campus buy-sell-rent mobile app from wireframes to interactive prototypes, built a storytelling-led marketplace connecting artisans to buyers through narrative-driven navigation, co-founded a startup and led product design for a crowd monitoring dashboard based on user research with event organizers, and applied human-centered design to build an AI-assisted platform for educators in resource-constrained classrooms.

EDUCATION

IIIT Hyderabad B.Tech in Computer Science, M.S. by Research in Computing and Human Sciences Dual degree offered by the Human Sciences Research Center (Human-Computer Interaction / HCI foundation)	2021–Present
Mary Gardiner’s Convent School Class XII — 90.1%	2021
City Montessori School Class X — 94.2%	2019

EXPERIENCE

SERC Digital Twin • Designed dashboard UX and data visualization for a real-time environmental monitoring system tracking 4 sensor types across campus buildings. • Translated continuous IoT sensor data (temperature, humidity, water, air quality) into actionable visual displays with clear information hierarchy.	<i>Environmental IoT</i>
TAFEA • Engineered student client integrating LLM APIs through structured SDLC methodology with interaction design for tailored student workflows. • Designed tailored student workflows with AI-powered features and iterative user testing.	<i>System Design</i>

PROJECTS

Campus Mart • Designed mobile user interface and information architecture for a campus buy-sell-rent application with NFC-based item exchange and tracking concepts. • Created wireframes and interactive prototypes mapping the complete user journey from listing to transaction. • Applied visual design principles to craft a student-facing interface balancing usability with campus-specific workflows.	UI/UX Design, Mobile App
Katha Marketplace • Designed a storytelling-led marketplace prototype connecting local artisans to buyers through narrative-driven product discovery. • Developed wireframes and user flows prioritizing artisan stories as the central navigation mechanism.	Storytelling-Led Design
CrowdTwin • Co-founded a startup and led product design for a predictive crowd monitoring dashboard from research to prototype. • Conducted user research with event organizers, translating crowd management pain points into design requirements.	Product Design, Startup
Design for Social Innovation (TAFEA) • Applied human-centered design thinking to build an AI platform for Teach For India fellows planning extracurricular curricula. • Developed user personas and journey maps for educators, conducting research with 50+ teaching fellows to drive actionable design improvements.	HCD, AI-Assisted Platform
SERC Digital Twin • Designed dashboard UX and data visualization for a real-time monitoring system tracking temperature, humidity, water, and air quality. • Built the full-stack implementation (MongoDB, Express, React, Node.js) ensuring design fidelity from wireframe to deployed dashboard.	Dashboard UX, Data Visualization

TECHNICAL SKILLS

Languages: Python, C/C++, JavaScript, SQL, HTML/CSS
Technologies: Machine Learning, PyTorch, Linux, System Design, Systems Programming
UI/UX and Design: Product Design, UX Design, User Interface Design, Wireframing, Prototyping, User Research, Visual Design, Interaction Design, Information Architecture, Human-Computer Interaction (HCI), Design Thinking, Mobile Design, Responsive Design, User Personas, Journey Mapping, Usability Testing, Cross-functional Collaboration, Agile

HONOURS

UGEE Rank: 111 out of 40,000+ candidates
JEE Main: 96.9 percentile
School Grades: Class XII — 90.1%; Class X — 94.2%

ACTIVITIES

Bass guitarist in college band and lawn tennis player.
