LinkedIn | GitHub | Portfolio

Computer Science Engineering student and researcher at IIIT Hyderabad working across software systems, machine learning, and human sciences.

EDUCATION

IIIT Hyderabad B.Tech in Computer Science Engineering M.S. by Research in Computing and Human Sciences (Ongoing)	2021 - Present
Mary Gardiner's Convent School Class XII - 90.1%	2021
City Montessori School Class X - 94.2%	2019

EXPERIENCE

SERC Digital Twin • Developed a real-time environmental monitoring dashboard using the MERN stack. • Integrated local sensors for temperature, humidity, water, and air quality monitoring.	Environmental IoT
TAFEA • Designed a student client software system using standard SDLC methodologies. • Integrated LLM APIs to support tailored student-facing features and workflows.	System Design

PROJECTS

ML for Local Geoguesser Python, Machine Learning, PyTorch • Built a ResNet50-based model to estimate latitude, longitude, region, and viewing angle from images. • Reached 92% region accuracy on the classification component.
ElectoralSim Python, Simulation, Open Source • Developed an open-source Python library for simulating electoral systems and voting methods.
CrowdTwin Next.js, Product Design, Prototype • Created a predictive crowd monitoring dashboard prototype for a tech product entrepreneurship course.
Design for Social Innovation (TAFEA) Human-Centered Design, Education, AI • Designed an AI-assisted platform to help Teach For India fellows plan extracurricular curricula for resource-constrained classrooms.
Highland History Project Machine Learning, OCR, LLM • Used OCR and LLM-assisted text recovery to digitize historical documents for Himalayan trade network research.
Age Prediction Model Machine Learning, PyTorch • Developed an image-based age prediction model using transfer learning and compared it with ensemble methods.
Campus Mart UI/UX Design, Prototyping • Designed UI/UX for a buy-sell-rent application featuring NFC-based exchange and tracking concepts.
Katha Marketplace UI/UX Design, Wireframing • Designed a storytelling-led marketplace prototype for local artisans.

TECHNICAL SKILLS

Focus Areas: Software Engineering, Machine Learning, Human Sciences
Languages: Python, C/C++, JavaScript, SQL, HTML/CSS
Technologies: Machine Learning, PyTorch, Linux, System Design, Systems Programming
UI/UX and Design: Wireframing, Prototyping, User Stories, User Research, Interaction Design

HONOURS AND ADDITIONAL WORK

- UGEE Rank:** 111 out of 40,000+ candidates; **JEE Main:** 96.9 percentile.
- School Grades:** Class XII - 90.1%; Class X - 94.2%.
- Activities:** Bass guitarist in college band and lawn tennis player.
- Additional public work:** [Research - Representing India](#), [IPL Strategy Lab](#), [TempusLogic](#), [WebTTS](#), [amReader](#), [IIIT In Context](#), [Mental Health Toolkit](#), and [ZenFocus](#).
